

## HOW TO SUBMIT YOUR CITY FILE

According to this year's teacher handbook, page 46, Rule #10, students must use a pre-designed Region available on the Future City Web site.

[http://www.futurecity.org/resources\\_simcity-starter-regions.shtm](http://www.futurecity.org/resources_simcity-starter-regions.shtm)

The starter regions already have the neighbor cities and a blank city tile square for the teams to build their Future City. The neighbor cities can help a city develop quicker/better etc., but they are not really necessary, especially since our scoring will not take them into account.

To submit your city, a team will **only need to submit the single City Tile Square that has their Future City**. The file will be "*City - <city named by the school>.sc4*" The file should not be tremendous and be "emailable"

For Windows XP operating system

1. Go to "Desktop" folder
2. Open "My Documents" folder
3. Open "SimCity 4" folder
4. Open the Region folder with the name of the SimCity the region (starter region or another region name if used)
5. Right click the file with your city name and the .sc4 extension to "send" or drag the file to an email attachment to your coordinator.

For Windows Vista operation system

1. Go to the "Desktop" folder
2. Open the "folder of the user name who Installed SimCity"
3. Open "Sim City 4" folder
4. Open "Regions" folder
5. Open the Region folder with the name of the SimCity the region (starter region or another region name if used)
6. Right click the file with your city name and the .sc4 extension to "send" or drag the file to an email attachment to your coordinator

For Mac users.

SimCity4/Regions/<region name>/"*City - <city name>.sc4*" will be similar.
